Solar PV Modules

PANASONIC
Mono PERC -18.3 %Modules Efficiency
HIT - 19.7 %Modules Efficiency
POLY – High PID Resistant

ADANI
Modules with 3% higher energy output than Industry Average.

EMBRO -Bifacial 415Wp
Upto 80% higher power generation from the same area,

VIKRAM Solar-Higher output of module power by reducing cell to module power loss

Solar Inverter

On Grid inverter

POLYCARB SOLAR

HITACHI
Inspire the Next

Off Grid inverter

Min. 80µ Hot Dip GI

Module Mounting Structure-Simple Design & More Productivity Analyzed for Critical Load.
GP Sheet, Hot Dip, FRP, Almunimum Structure with complete accessories
Anchor Fastener, Allen Bolt, Spring Nut, FRP Walkway, Z /U Clamps

BoS - DCDB, ACDB, AC-DC Cables, MC4, MCCB, MCB, SPD, Data Logger, Lugs, LA, Cables Ties, Fuses, Ferrules, PG Glands, Insulators, GI/Al Strip, Cu & GI Earthing Kit, Earthing Pit Cover, fisher chemical

Combiner Boxes, ACDB, DCDB, LT HT Panels

ELECTRICAL EQUIPMENT

-: Lets shine your dream with solar. :-

Manufacturing Combiner boxes of all types, ACDB, DCDB,
LT-HT Panels

Using Tier 1 quality components from
top manufacturers like CITEC, Fibox,
ABB, Phoenix, Bussmann

CONSULTANCY

On Solar Energy Projects

- :Lets shine your dream with solar. :-

01

FEASIBILITY STUDY

Site survey to analyze available area, soil or structure stability, infrastructure required

02

SIMULATION STUDIES

SPV capacity, Electricity Generation, System Losses, Shadow analysis after studying location, Solar Irradiation & Meteorological data

03

TECHNOLOGY SELECTION

Analysis & Selection of best available technology

04

DETAILED PROJECT REPORT & I&C

Report to assess the Feasibility & Viability of the project and Risk mitigation plan

We guide our clients or investors through the complete process of project feasibility, application facilitation, project financials, bid process management, vendor finalization and supervision of project execution up till successful project commissioning which meets our strict quality criteria.
